

# Willkommen in dem Advan-CED Lab.

**Leonardo Essam Dei Rossi**  
*Certified Apple Teacher*

# Today we are going to see...

- \* How technology...  
... fits with school lessons
- \* How technology...  
... makes you think outside the box
- \* How technology...  
... can create a work environment

# Today's steps

## **Step 1 - It's history class time!**

It's time to take a trip to the crib of the modern Europe...  
welcome to the ancient Rome!

## **Step 2 - Students meet VR**

Do you think that Virtual Reality is only for gaming?  
Well today I'm going to demonstrate the opposite!

## **Step 3 - What I've learned today?**

Feedbacks are the most important part of a project, feel  
free to share your thoughts about what we did today!

# Step 1 – It's history class time!

It's time to take a trip to the crib of the modern Europe...  
welcome to the ancient Rome!

# When did all start?

## **“Ab Urbe condita”**

Everything started “officially” in 753 b.C. (before-Christ) with the foundation of Rome and it’s still where it was created more than 2000 years ago!

# And what about Trento?

---

**Trento was founded as a roman colony (aka “Tridentum”)**

The first insediamenti we can find here are from the first century b.C. (before-Christ) and again, after more than 2000 years they are still here!

# Step 2 – Students meet VR

Do you think that Virtual Reality is only for gaming?  
Well today I'm going to demonstrate the opposite!

# VR is not only for gaming!

**VR headsets can create infinite ways  
to discover and be creative**

Be ready to start our brand-new time machine and go  
back to the past to see what the Tridentum used to  
look like more than 2000 years ago!

# Danke schön!

**“Fantasie ist wichtiger als Wissen, denn Wissen ist begrenzt”**

Albert Einstein

\* dal Tedesco: ***“L’immaginazione è più importante della conoscenza perché la conoscenza è limitata”***
